Summary

Full Stack Developer with hands-on experience building and deploying web applications using React, Node.js, and AWS. Experienced in RAG-based AI systems, containerization with Docker, and working across the full development lifecycle in professional environments.

Education

JSS Science and Technology University (SJCE)
B.E. Computer Science and Engineering • CGPA: 9.19

2022 – 2026
Mysuru, India

Experience

Abstrabit Technologies

Apr 2026 – Present

Full Stack Developer Intern

- Built and deployed full stack features end-to-end using React and Node.js with deployment on AWS (EC2, S3) and containerization via Docker.
- Identified and resolved bugs across the stack, improving application stability and user experience.

Aurigo Software Technologies

Jun 2025 – Nov 2025

Software Development Engineer Intern

- Enhanced *Aurigo Masterworks* using C#, ASP.NET, JavaScript, XML, and SQL; diagnosed and resolved performance issues increasing system reliability.
- Collaborated with cross-functional teams using Git and Azure DevOps for code reviews, PR workflows, and version control.

Freelance Software Developer

Feb 2025 – Feb 2026

React Developer

- Built and deployed the official website for SKMK College of Education, improving digital presence 📄.
- Developed and deployed a website for Assured Services Mysuru to showcase their services and portfolio, featuring responsive UI and real-time data handling 📄.

Novus Webspace Technologies

Oct 2024 – Nov 2024

Software Development Engineer Intern

- Optimized MERN-based platform APIs, reducing average response time by 30%.
- Implemented new features and resolved 15+ bugs, improving system stability by 40%.

Projects

Campus Connect — React, Node.js, Express.js, MongoDB 📄

- Developed a full-stack platform for resource sharing, alumni insights, and student Q&A.
- Implemented secure authentication, RBAC, and an organized resource library module.

Supply Chain RAG System — React, Node.js, Qdrant, Gemini API 📄

- Built a RAG pipeline using Qdrant for vector search and Gemini API as the LLM to generate context-aware responses grounded in supply chain documents.

Technical Skills

Core CS: Data Structures & Algorithms, OOP

Languages: Java, C (Intermediate), Python (NumPy, Pandas, Matplotlib), JavaScript

Web & Backend: HTML, CSS, Tailwind CSS, React, Redux, Node.js, Express.js

Databases: MongoDB, SQL, Qdrant

AI / LLM: Retrieval-Augmented Generation (RAG), Vector Embeddings, Gemini API

DevOps & Tools: Git, Docker

Familiar Tools: AWS (EC2, S3, IAM)

Certifications & Achievements

DSA in Java — Apna College — Full-Stack Web Development — Apna College — Hackathons: Flipkart GRID 6.0, TVS E.P.I.C 6.0, Hack-Kshetra (Top 30), Hackfest (Top 60/700+), SIET Hackathon
